Comments: I have been camping with my family at Holland Lake for seven years. In recent years it has become our favorite place to camp. We spent six nights there this year. We love Holland Lake for the quiet, the pristine water, the undeveloped shoreline, the breeding loons, and the limited motorized use on the water. I fear that all these values are threatened by the proposed expansion of the lodge. More rooms and cabins will mean more impacts to water quality, more noise, more disturbance to the loons, more traffic on the road. Holland Lake has a delicate balance that is unique and wonderful. It has just the right amount of camping, not too many private homes, a modest and appropriate lodge concession, and lots of native shoreline. We should keep it that way please. I object to the proposal!
