Title:

Comments: Please do not approve the fast-tracking of this project that will have a major impact on a sensitive area that is critical to the humans, animals, plants, and water quality who live nearby. The proposed changes will have an outsized impact on the surrounding area and environmental resources that are deeply valued by many. A full environmental review is necessary to evaluate and understand what impacts will occur. Please do not fast-track or approve this proposal. Our family and many others has cherished this area for generations, and we do not accept such sweeping changes proposed by entities that primarily value investment return and profit. Please maintain the quiet beauty of this amazing area.
