Comments: I have been visiting Holland Lake since 2003. Increased tourism in Montana has increased use significantly at Holland lake in the past 3 years. The campgrounds are sold out six months in advance, the trailhead is crowded, etc. Increasing the number of cabins and capacity of Holland Lake Lodge will only exacerbate the overuse issue. Not only will there be more people but there will be more garbage and more sewage, more dust/sediment to impact our waterways. Increased use on Holland Lake decreases the recreational experience for all other users. The residents of Montana enjoy the solitude this lake offers. Creating a resort will only cater to wealthy out of state users, not middle class Montanans. Please don't create another playground for the wealthy at the expense of our natural resources.
