Comments: To whom it may concern,

I object to the proposed expansion of the Holland lake lodge. My family has been tied to the areas since the 1950s, while I do believe in building new lodging I have concerns about the environmental impact of it. The impact on the wildlife in the area including grizzlies, loons, mountain lions, etc. Increased traffic in the area can be dangerous for both wildlife and people. Along with this the impact of increased traffic is also concerning as the area is not equipped to handle a large increase in car and foot traffic. I urge you to do a complete environmental impact survey before accepting this proposal.
