Comments: To whom it may concern,

I am writing because I am absolutely appalled that Holland Lake could become a tourist trap. Please, don't let this happen. Montana is called the Big Sky State because of our wide open spaces. Please, don't take that away from us any more than it already is. I understand making money and attracting tourists to spend money in our state but people won't want to come here anymore if we fill the state up with businesses and people. We need to preserve what we have now. Not build more. I have already in my 60 years of living in Montana seen so many secluded places become just another tourist trap. There has been less and less places to go in Montana to "get away". The uniqueness of Montana will be gone. Let's save Holland lake for Montana!!

Sincerely,

Susan Scalise
