Title:

Comments: Please stop lining the pockets of individuals/corporations at the expense of what Montana has to offer. The negative impact of this expansion will be substantial. The fact that people have to tear down nature in order to enjoy it is truly mind boggling. And what's it all for realistically? Don't kid yourselves into thinking it is for people to enjoy the outdoors, the real answer is money. Please don't contribute to an already existing problem - greed and the destruction of the environment.
