Comments: I don't see why the FS is skipping the 60-day public comment period, and giving us 20! And y'all would just be fine with that, as long as we didn't complain. Come on!

Also, an EIS is imperative, as was prepared for the Big Mountain expansion in '95.

Seems to me that the Holland Lake expansion is all about corporate greed, with zero regard for wildlife; anyone who lives nearby (including humans) will have to breathe all the particulate pollution, and suffer through a ton of noise during the construction phase. Fewer trees = more carbon pollution.

I don't give a rat's ass about a bunch of rich people who get to visit a new "playground". I value trees, oxygen, bears, turkeys, and butterflies.

The FS needs to step up and stop this project.
