Comments: Please reconsider moving forward with this project. I have been a frequent visitor to Holland Lake for camping, hiking & swimming for the past 18 years. This project would kill all that is so sacred and special about Holland Lake. The project is exactly the opposite of what needs to happen to this rustic and pristine area. It needs to be preserved and left alone for the future generations to enjoy. Just because we can make a profit off of nature, doesn't mean we should. Some places should be left untouched. The environmental impact the construction, human waste & car traffic would be terrible-so close to the grizzly rehang site, the amount of pollution to the lake & the trash left behind by visitors who don't have a strong connection to the area.

. I have a hard time believing anyone who has been to Holland lake or even seen pictures would agree with this project. It's the wrong move & I, along with MANY others do not agree with the proposal.

On a final note, a considerable more amount of time should have been given to the public to review the proposal, so that tells me that the corporation behind this project already doesn't respect or care about local opinion-they are too motivated by dollar signs and right there is your red flag warning.
