First name: John

Last name: Fletcher

Organization:

Title:

Comments: This development seems based on high usage. I'm concerned about:

- sanitary sewerage and sewage treatment
- re-engineering the trail to Upper Holland Lake to serve the increased traffic
- pressure to accommodate motorized vehicles on this trail
- need for permanent USFS resident staffing
- degradation of water quality in Lower Holland Lake (increased motorized watercraft)
- pressure on "externalities" (maintaining a workforce, developing a local service economy, etc.)
