Comments: Creating a mega development at Holland Lake will ruin the rustic charm of the area. We do not need more greed hungry companies ruining this area. Why allow this area to be ruined like so many other places where mego developments are allowed?

And trying to push it through without proper comment period or an environmental review is not right. The public deserves the right to comment and to know what is happening. An environmental review is going to show a lot of harm to the area. Why would this be allowed?
