Title:

Comments: The Holland Lake Lodge Master Development Plan has given the public very short notice for comments. It's not clear why it deserves a CE designation and it certainly would benefit from a full EA or EIS. The original intent of a CE is being manipulated for private gain.

Montana's special assets are being sold off quietly, and hurriedly, to private corporations.

A full 60-day comment period and in-depth environmental assessment should be mandatory. What is the rationale for such a short comment period? It has "bad optics" and does the Montana citizens a disservice which will likely be fought in court: a waste of National Forest resources.
