Comments: I am very concerned about the proposed changes to the Holland Lake Lodge property. Holland Lake is beautiful, unique, small and quiet, and this proposed development threatens to permanently damage the very character and rustic wild charm that attracts visitors. An expanded lodge of this scale would absolutely have very significant negative impacts on noise levels and shoreline as well as impacts to the lake's viewshed, watershed and native wildlife, not to mention increased boat traffic. I feel the proposed development is much too large for this particular lake. More than tripling usage by going from the current max capacity of 46 to a proposed max of 156 is unacceptable to me, and probably is to most current users of the lake.
