Comments: I appreciate the opportunity to comment on this. My family and I mostly recreate in this area by hiking. Several of my family have minor disabilities and so have to have easier trails like the one to the falls. This trail is already relatively heavily trafficked. I feel a larger resort type facility right up the road would have all that more of an impact on this trail. I can also easily imagine the greater impact it would have on recreating on the lake itself. Not every place in the woods needs to be "developed to the fullest". The other thing that concerns me is the impact to the wildlife, most notably the loons that nest here. We love the lodge that is there and will often stop after our hike for food and a cocktail, and a sit in their back by the lake and enjoy the view and calm. I can understand upgrades like updating the cabins, infrastructure, etc..., but the lodge's charm is in its coziness. I hope you will say no to any large expansion. Thank you for listening.
