Comments: Projects constructed under special use permits deserve thorough review with ample opportunity for public input. A resort of this size will further limit the ability of the public to use its resources with yet another expensive playground for the wealthy. Have traffic studies been completed? Has the impact on wildlife been analyzed? The proposed development is out of scale with the area. I would welcome a development that is consistent with the historic use but not one that is essentially an amusement park. It should be thoroughly reviewed as the name "special use" implies. This is a significant change that will greatly increase the impact. No shortcuts for developers - this is a public resource!
