Comments: I object to Holland Lake Lodge Facility Improvement & Expansion #61746, specifically the expansion there of, without a full a proper environmental and transportation corridor review.

Significant expansion of the Holland Lake Lodge facilities will have greater impact on the surrounding environment and on the rustic and historic nature of the property. This expansion will also increase recreational visitation to the area which will have impacts to local use and on the local transportation infrastructure and traffic.

This project, as currently scoped, will change the essence of the Holland Lake and Swan Valley experience that has been enjoyed by generations of Montana residents past and present.

Sincerely,

John Conner
