Comments: Dear Sir/Madam:

I am writing to express my deep discontent that the Holland Lake Lodge Development Plan was not published until September 6, 2022, leaving the public too little time to review and comment on this 36-page document and the Forest Service's 16-page scoping document by September 21, 2022. The Forest Service is also gravely mistaken in its view that this enormous proposed development can be categorically excluded from either an Environmental Assessment or Environmental Impact Statement. The Forest Service must provide 60 days for public comments on the aforesaid documents and prepare a full-blown Environmental Impact Statement that assesses in detail the unmistakable negative impacts of this proposed profit-driven adulteration of historic public lands and natural resources/ecosystems. Thank you.

Michael R. King
