Comments: Though I agree that Holland Lake lodge needs some updating and repairs, I'm opposed to the building of a new lodge, restaurant and cabins because it will completely change the peaceful nature of this area in our forest service land, which it's primary purpose is for the enjoyment of the people. Holland Lake is one of the few beautiful remaining places where people (especially locals) can enjoy some true Montana nature. This massive expansion would change the footprint of this area, allowing much increase in noise pollution. It is a haven for loons, they would simply be displaced from their nesting grounds because of this increased noise pollution and the constant boat and people traffic. There's absolutely no need for floating docks at this site since it's completely accessible by road and it is a very small lake. This is simply a large company wanting to build another playground for the rich and ruin this very small Beautiful lake.

Thank you for your consideration!
