Title:

Comments: Please stop the development of the few natural habitats we have left. This development will continue to grow over the years and affect our wildlife and destroy over time the beauty that has attracted millions of people over the years. It is simply too big. We have loved and enjoyed the lodge for 20 plus years and would live to see it restored on the same foot print. It should continue to be a small lodge where all can enjoy the beauty of the lake and all Montana has to offer without destroying the wild habitat.
