Comments: Why do development companies come to Montana and think we want to expand and enlarge our facilities and access to our wilderness without responsible and further analysis and documentation required by an Environmental Impact Statement or Environmental Assessment?

Seems like they are pushing this through before the public is even aware of this or has time to respond.

We just hiked Holland Lake and Holland Falls last weekend and love the rustic character of the existing lodge and camping areas. We have loved hiking this area for 30 years and are heartbroken and sickened by these big development companies coming in to change what we love about Montana!
