Comments: It is truly disappointing how a government organizations has sold out to what will cause the destruction of what makes Montana such an amazing place. The forest service has proceeded with the approval of this project in an extremely clandestine way and was officially lost the respect of not only those who live within the state but also of those who want to protect the state. The project will cause substantial harm to the direct area and the environment surround the property. The property is located along the bob Marshall wilderness and the foreigners who choose to visit will surely have run ins with the animals who call that area home. I guarantee that the Californians who will riddle the property will do absurd things that will cause many many animals to be put down. I cannot count how many times i have heard of stories of foreigners doing things they should not be and the animal is ultimately at fault. Stop destroying the state and stop with the collusion. The forest service will forever lack credibility and should immediately withdrawal any approvals made for the plan.
