Title:

Comments: I am not from Montana, however I have been visiting for the last 25+ years. First as a child, now as an adult, visiting with my children. One of the great things about America is our national lands and parks. The pristine beauty can not be re-located nor restored after a project like this. Please keep Montana as beautiful and natural as its has been for generations. My family and I go to Montana for the experience of nature that we cannot get in the city of Dallas. We do not go for high speed internet, expensive restaurants, and fancy living. We love Montana because it is where we can get away from those very things.
