Comments: I object to the Holland Lake Lodge Facility Improvement & Expansion #61746 in its current format. I believe that the size of the main lodge and increased number of out lodges would negatively impact the current natural beauty and compromise existing habitat. Improvement is not the issue, I think that the current Lodge could in fact benefit from some improving, however I believe it could be done without damaging current natural habitat. The great appeal of Holland Lake is that it is quiet, nearly untouched or affected by technology (including towers and cables) and has allowed for animals such as loons to remain undisturbed. The proposed plan, as currently depicted, would not preserve these qualities that are in fact the true appealing factors to The Holland Lake Lodge and surrounding area.
