Comments: I just learned about this project today. I find very strange that such a project using public land in such a pristine area is so easily "given away" to a big business. The 'old' lodge was 'grand-fathered' and integrated well with the natural surroundings. It will no be the case of this project.

What benefits is there for Montana ? This is not California or Utah, this is Montana.

I hope this is going to be stopped.

I would be very interested to have the name of the person(s) at the Forest Service responsible for allowing such a project to even exist...

Thank you.
