Comments: I have lived in Montana my entire life. I remember growing up taking trips to the mountains all throughout the spring, summer, and fall. Most of these trips were sporadic moments with great memories. Now being a Montana citizen, we are losing our right to live and enjoy our state! It is being over run with out of state and out of country tourists! These tourists do not respect our rules or our wildlife. We can't even enjoy our National parks or any campgrounds because you have to reserve a spot which is booked out at least a year in advance. The last thing we need is for some rich company to come in and over populate another area of Montana. Yes jobs would be great, if they were given to locals. Go to glacier and yellowstone and all the workers are from out of state and out of the country. No one can afford to live in the areas to work either because out of staters are paying ridiculous ammounts of money for homes and land. Go to Columbia falls and Kalispell, every business is closed by 7pm because they cant find anyone to work because no one can afford the cost of living anymore. Bozeman is already ruined and Whitefish also. Please stop making Montana into California! We don't want the recognition or the people! You will be turning OUR Last best place to the worst!
