Title:

Comments: I categorically oppose the re-development of this site. The USFS should not be in the business of effectively subdividing our public lands to for profit investors. Additionally, this is an environmentally sensitive area and the lack of a thorough environmental assessment on the full impact is unacceptable. There is no net value to the public only to private sector investors. I would also like to see an investigation into the way this project has been advanced with very limited public notice and input to determine conflict of interest relative to the permitting of this project. This feels like just another abuse of public resources. Let POWDER develop their resort on private land NOT public.
