Comments: Supervisor Steele,

I write today to request a full environmental analysis and at least two months additional time for public comment. This environmental assessment will, among other things, determine whether a full environmental impact study is advisable, which it most certainly is for such a pristine area. I think I speak for the majority of American taxpayers when I say that fast-tracking such a proposal will not be in your best interest and will reflect very poorly upon the Forest Service. How can you claim to be stewards of the land when you are attempting to bypass the system in order to get this passed as quickly and quietly as possible? I would like to see a full, complete, professional and thorough review of this proposed mega-resort.
