Comments: Holland Lake is a beautiful one of a kind connection to the deeper wilderness that lays beyond in the Bob. Allowing a company to develop and quadruple occupancy will have a negative impact to the soul of this area that will be irreversible. by moving this proposal forward you will kill what it means to enjoy nature at Holland lake. Don't let a conglomerate destroy what makes this area so special. this isn't just a resort they are proposing but a change to what it means to recreate and relax at Holland lake. For many of us this place holds deep meaning and nostalgia. This is our favorite connection to our public lands. Our happy place. don't destroy it by allowing this to happen to such a magical place!
