Comments: To whom it may concern:

I just heard about this new project that is happening on Holland Lake and I am appalled at what is to come with this beautiful lake. This lake is full of history and beauty all to be torn down to build just another resort. Holland lake does not need a resort built on it. Tearing down trees for this resort, will destroy the land and the homes of the animals that live there. There are plenty of other places in Montana that a resort could be build but Holland Lake should not be the place. Do not destroy the beauty of this lake or the homes of the animals that live there. We should be protecting the beauty of the land and not allowing this to happen. Please rethink this.

Thank you,

Amy
