Comments: I do not live in Montana however, through some very dear friends, I have come to love the Seeley/Swan Valley. The very thought of this development makes my heart sick. The people I've met and come to love in that area are hard working, patriotic Americans that want nothing more than to live their lives, raise their kids and be at peace with their neighbors and the land. They did not ask for and do not want to be developed into the next Park City. I'm reminded of a statement George Carlin used in his act, "what a beautiful wilderness, let's develop it."

I also suspect that something is rotten in the Forest Service. If they are so willing to give the go ahead to this project without a full EIS, well someone or ones are getting greased. I used to watch Yellowstone and think it was total fiction, I'm now realizing that it's much closer to reality than I could have ever imagined.

LEAVE THE SWAN VALLEY TO MONTANANS!
