Comments: As a person who is considering moving to Montana because I am sick of the corruptness that has taken over California, and seen what damage a audacious project like this has on the real feel of an area, this wreaks of familiarity. Such a short review period does not allow your local public the chance to even be aware of the project. And to publicly state in an article that public comment won't have an affect weather it meets the requirements of a CE through NEPA or not is just not good practice.
