Title:

Comments: This project is grossly out of scale to the lake and surrounding natural environment. It will ruin the already fragile balance of recreation in a wilderness buffer zone. Ruining this beloved lake for the sole benefit of the POWDR shareholders is the exact opposite thing the Forest Service should be working towards. There is little to no benefit to local residents or Montanans in general.

That being said it's an existing resort and small improvements or tear down/rebuilds are reasonable. This project is not that!! Please consider these public comments. I'm quite sure there is little public support for this monstrosity.

Hotels are a dime a dozen. Holland lake is not.
