Comments: The job of the forest service is to protect the forest. I believe this project would do incredible damage to this section of forest. How can anyone allow a project of this scale to be considered. It goes against everything the USFS stands for. Seems like someone at the top is being "paid off" to allow such a project. Look at the location I was born and raised in, once you allow the flood gates to open it can never be closed and will never be the same again. So sad!

Please honor the USFS integrity and keep the forest wild.

If you want to allow an upgrade they could allow a developer to build new buildings in place of the old, but should restrict them to the current sq footage and number of existing buildings only. No new additional buildings or parking lots should be allowed.
