Comments: I strongly oppose the proposed expansion. The Holland Lake corridor is of massive ecological importance. Animals use Holland Lake to travel between the Bob Marshall Wilderness to the Mission Mountain range and vice versa. Loons, a species of concern, nest and raise chicks on the lake. Holland Lake is already a very popular lake and increased traffic from a resort would only serve to further harass the wildlife that call the area home. Holland Lake is rustic and serene. This proposed project is unwelcome and promises to wreck the character that Montanans cherish and that wildlife deserve. I urge you to reconsider.
