Comments: Please do not allow POWDR to build on Holland Lake. I believe this will create an eyesore in a beautiful part of Montana. In a time when Montana is the Last Best Place, we need to preserve it's beauty. I moved to Montana 23 years ago because I wanted to live in a beautiful state and live where companies like POWDR have destroyed beautiful places. People are complaining about climate change and carbon dioxide in our air. Science will tell you that people breath in oxygen and breathe out carbon dioxide. Plants and trees take in carbon dioxide and emit oxygen. I have heard that POWDR is intending to remove 200 full grown trees. By cutting down those trees POWDR will leave a very large carbon footprint. I, again, am requesting that you deny POWDR's plans to cut down trees and create an eyesore on Holland Lake.
