Title:

Comments: I am against the development of this project. I believe the overall project size is too large and would gravely impact the environment. Being a Californian I am all too familiar with the urbanization of scenic locations that were once like Montana. This development will set precedence for further development along this beautiful lake which will have drastic affects. The company has shareholders which cause a company to only have an interest in being profitable instead of preserving the environment. Currently the company is being sued because they want to expand some property at Lee Canyon Ski Area which is endangering the local butterfly population which is on US Forest property. This is a bad idea.
