Title:

Comments: I am strongly against this project and request all governing parties, stakeholders, and the appropriate regulatory agencies have weighed in FULLY before this project is allowed to proceed any further. No permits should be granted, no further approvals or land granted until all proper agencies and the public have been heard and reports filed. There should be no across the board approval by ONE person. This project is huge and impacts people, land, water, forest, utilities, animals, wildlife, traffic, and more! It doesn't appear that environmental studies have been done. How is that even possible?!? This project will leave too large of a footprint in a small area. This area does NOT need a large RESORT. The fact that an out of state company that specializes in resorts and have TERRIBLE reviews is the least of it. I understand if the existing property and buildings needs upgrading, but everything everyone who visits this lake and location are not looking is NOT what they are proposing in a full scale resort. It will be destroyed. Please reject this project. Please follow proper procedures to investigate this project fully. Do your jobs.
