Title:

Comments: Holland Lake is a pristine environment that does not need more development. At what price is the USFS going to sell /lease all of our public forest land to be used for private entities? You can't unscramble an egg. When is enough, enough?! I implore you to think, (you know the purpose you were given a brain for) about future generations and wildlife conservation in the area. Some things in life are PRICELESS, and forest service land is one of those. Put your effort into preserving natural environments, not filling them with septic systems that can fail, pesticides runoff, and view obstructions. Thank you and your grandchildren will thank you too.

Jodi Cyr
