Title:

Comments: The scale of this project should not be approved as it does not fit with the goals of the land or why people like myself come to Montana. Allowing the removal of 150+ trees will have a huge environmental impact to the area as will the additional parking areas and structures. Prestine land can only remain that way by keeping the toll by humans to a bare minimum. A project on this scale will impact wildlife, will negatively affect the night skies for tens of miles in all directions, and must not be approved based on the scope of the proposal.
