Comments: I am a long-time tourist of Montana and a descendant of a Helena, Montana family. This development really bothers me as Montana is one of the last of the wide-open and wild states. Putting a large resort on the current site of Holland Lake Lodge will forever change the landscape as well as impact the environment negatively.

Please keep this spot of U.S. Forest Service land free of this large development. My family and I visit Montana to get away from these types of developments.

Thank you for your time and consideration of my comments.
