Comments: Hi Forest Service reps,

I want you to know how excited I am to see the Holland Lake development. I believe in preserving the past, though also making space for those after us. This project I believe can do that and I'm in favor of it's approval.

I'd like to see:

1. Preserving the night sky. Ask the developer to use low light fixtures and or hoods above flood lights. Also as many of the lights pointing away from the lake.
2. Public parking and trail development upgrades or signage and garbage removal. Keep it neat and clean.

Thank you for helping us preserve the future.
