Comments: My family and I moved to the Flathead valley from Florida ten years ago. We left Florida because of the over population created by Disney world. If you could see Florida as it was before and after Disney you would see a beautiful pristine state that was destroyed. We moved to Montana because we loved it just the way we found it not to change it! Nothing about this project enhances Montana, it only encourages a bunch of outsiders to come here for a few days and leave behind their trash. Projects like this take what we all love about Montana and turn it into what we hate.
