Comments: Hello,

I am reaching out today to voice a great amount of concern over the proposed project on Holland lake. If allowed this project will be a slap in the face to the community, the environment and the public lands recreation of the area.

Holland lake is a very special place, abundant wildlife, very little boat traffic. A true recreation paradise for true Montana's. It is one of the few gems left in Montana that's is relatively untouched by outside influence. Creating a massive resort in place of the quiet little lodge currently of the lake will no doubt compromise the tradition, peace and secluded beauty that is Holland lake.

This will also be another example of wealthy out of staters exploiting our beloved state and citizens. This project will not make any Montana's wealthy or even create well paying jobs at that. Yes there will a few house keeping jobs and lawn care that locals will be hired for, but you can be guaranteed that the chefs and managers will be from large cities out of state.

All the money generated from the resort will be going straight out of Montana. The only thing we will see is, more traffic, higher housing costs in the swan valley and higher property taxes for the little family cabins on the lake.

This resort cannot be allowed. Every single Montana resident I know opposes this terrible resort.

Please stand up for Montana, the last best place.

Thank you
