Title:

Comments: I vehemently oppose this project. The Holland Lake area is pristine and rich in history. Razing historic buildings and replacing them with modern facilities will ruin the wilderness-edge aesthetic of the area. Progress has its place, and can be a good thing, but the type of progress must be held in check. Distant corporations make decisions based on P&L statements, not based on what is good for the land, flora, fauna or the people that live and spend time there. Please reject this proposal. Thank you.
