Comments: I was born in MT, own property in MT, have many relatives still living in MT and I visit on a regular basis. Holland Lake is a gem unlike most others. The removal of trees for the construction of parking lots and buildings to support an out of state developer would ruin the area and most likely the lake itself. Being a small lake, it cannot take a large increase in use without becoming considerably more polluted. Please do not approve of the removal of any trees or the expansion of any part of the existing lodge! Preserve what makes Montana unique and special - it's wilderness and beauty.
