Comments: This project is going to deface the beauty of the lake. We go out to the lake to enjoy the wonderful outdoors. Cutting down the trees building large unsightly buildings does not look like proper management of preserving our land. This looks like a project for a bunch of rich people with high speed internet thinking they are in nature sitting in a 13000 square foot lodge. Look at Park City, that place is so built up now that you can't even see the slopes with lodges all over the mountain. This is not An improvement on the property this is a total new build with no impact studies ruining the surroundings that we come out to enjoy.

Say NO to this plan and look at improvements instead of defacing and replacing.
