Title:

Comments: I am absolutely sick to hear about this planned project... Having been born and raised in California, I have seen first hand what corporate greed brings to small town living, it is unfathomable to me that you, who is given the task of preserving these beautiful lands would even consider allowing this type of project and the burden/impact that it will bring to this beautiful land, lake and wildlife, quite frankly you should be ashamed and I truly hope that you realise what you have and put a complete stop to this development or you will be opening the door to turn Montana into the new California and once the cancer starts it spreads like wildfire..

Thank you for your time and I hope you do the right thing..
