Comments: This is absolutely ridiculous! Stop selling of our wild places to out of state money. I am proud to be born and raised in montana but every year I become more displeased with the management of our wild places and the willingness to sell them to highest bidder. It is your job to PROTECT our wild things in wild places. In case you haven't noticed we already have a tough enough time just using our public lands because of over crowding or lack of accesss, prime example, try to get a camp spot in swan valley in summer...not gonna happen. Thats because of the joke of the reservation system but i digress. This proposal is wrong in so many ways. It will not benefit the local community in any way, it will be a detriment instead. Most people that live in swan valley and surrounding communities probably couldn't even afford the place. To me its just another Paws Up for rich out of state clients to come and add to over crowding and dismantling of the montana way of life. History, traditions, cconservation and protection of the things us montanans hold near and dear is what's important! Stop selling away our kids chances to experience those same things.
