Comments: To whom it may concern,

I am completely opposed to the Holland Lake Lodge Facility Improvement & Expansion #61746. The project would disrupt the ecology of the area and the ability for the public to enjoy a quiet and sparsely developed area. I recreate in the Holland Lake area regularly and this development would make my boating, hiking, and camping experiences impossible, as the development would bring noise, crowds, and pollution to the area. The disruptions to wildlife, plants, and water systems would make the world that me and my friends and family live in less healthy. Do not allow this development to proceed.

Thank you,

Mary Auld
