Comments: Has any of these people ever read the Wilderness Act of 1964 that gave us (we the people) these public lands for recreational use? Apparently not! Congress was very precise when it set aside these lands for "we the people". The Wilderness Act of 1964 clearly states that these lands shall not be subject to "commercial enterprise" or "Usery". Congress said these lands shall remain

"unaltered". Now the Forest Service is selling away our public lands for profit. Use cost are going up and up so that before too long only the fat cat out-of-staters will be able to afford using these public lands. Just like the Flathead National Forest choosing to use Concessionaires to run the seventeen (17) campgrounds they own. These Concessionaires are in it for the money - - USERY.

Now, the Concessionaires are making a profit (commercial enterprise) off "we the people". The Forest Service has gotten lazy and greedy. The Forest Service was birthed out of the Wilderness Act of 1964 as "Stewards" of "our lands". Now they are Landlords. Very little government money is being put back into our recreational lands. Its a travesty. Montana is being sold out to the highest bidders. The out-of-state Liberals will destroy this beautiful state and there is NOTHING we (we the people) can do about it! Sad, very sad.
