Comments: Lake Holland is one of the few remaining unpolluted natural beauties that Montana has. If you allow this project to go through it will most likely ruin the surrounding environment. Not only will the citizens of Montana be losing their beautiful lake to an out of state company but they will not benefit from it. Allowing this project to go through will open up another massive hole for our economy to be drained as more and more large corporations steal money from not only the people but also the government of Montana. Please do NOT allow this expansion project on the Holland lake lodge to go through.
